

IGIP - SEFI

VISION STATEMENT “WORKING FOR CONVERGENCE”

In accordance with the leading Committees and upon approval of the General Assemblies of IGIP and SEFI, the two Presidents, Prof. Claudio Borri (SEFI) and Prof. Federico Flueckiger (IGIP), express following vision statements with the intention:

- To look for a maximum of **synergy** between the two Societies and to start a process of **convergence** towards a common pan-European (international) Association for Engineering Education, with the main scope of promoting its quality, internationalization and competitiveness within the many different existing education systems
- To commit the societies to organize **common events** (thematic workshops, WG meetings, annual conferences,...) and, as a long term objective: one common event per year
- To jointly promote and run **projects** on EE and research at European level (EC-DG EaC, EUA, ...) and participate actively in the networks supported by the EC (Thematic Networks) in this field
- To form a common **European voice** within the world of Engineering Education Associations
- To make the IGIP-SEFI Liaison Group (which has been set up at the end of 2005) as a **permanent Committee** working on all previous items
